Problem 10

It seems that I am not quite receiving the proper estimates, which may mean that I have done something wrong. Nonetheless, the logit estimate looks fine. Of course, I was not able to run the SVM model at all since it was taking too much time to run.

penalty	.estimate	alg	$\text{cost}_c omplexity$	$\text{tree}_d epth$	$\min_n$	.config	$\text{hidden}_u nits$	neighbors
0.00	0.85	logit				NA		
		NA	0.00	20.00	10.00	$\text{Preprocessor1}_M odel004$		
1.00		NA				$\text{Preprocessor1}_M odel080$	8.00	
		NA				$\text{Preprocessor1}_M odel30$		30.00
